

DRILLINGINFO SERVICES

Tangible Solutions to Complex Problems

HOW DRILLINGINFO SERVICE

1

Upstream Technical Solutions

Design custom geologic assessments and engineering analyses to optimize completions, maximize production, increase ROI, and assure investors that your high-science work is paying off.

2

Product Implementation

Install and deploy innovative products that keep you at the forefront of the E&P industry to make sure you are getting the most out of your partnership with Drillinginfo.

3

Market Fundamentals Assessment

The Drillinginfo Market Intelligence team will prepare a custom presentation focused on your market questions and present to your management team, board of directors, or at your shareholder meetings.

4

Midstream Strategy

Analyze pipeline, processing, gathering, fractionation, and storage assets by area, including asset valuation and counterparty risk evaluation. Evaluate the effects of proposed future pipeline projects on price differentials, and forecast gas, crude, NGL, and product transportation flow dynamics.

THE DRILLINGINFO DIFFERENCE

Provide the tools and training to enable you to become your own in-house expert

Increase speed and decrease your work redundancy

Utilize customized workflows specific to the business strategy

ES CAN HELP YOU

5

Acreage Analysis

By utilizing our proprietary tools and software, our team of experts can help analyze market fundamentals and break-evens by basin to inform A&D strategies, as well as assess the geological risk of a specific area and create type curves with economic profiles for due diligence in acquisitions situations.

6

Resource Maximization

Augment your internal team with our multi-disciplinary experts to provide support on critical, quick-turnaround projects or long-term, managed solutions.

7

Refinery Optimization Modeling

We utilize a proprietary crude and condensate linear optimization model to optimize crude flow for every North American refinery based on specific unit capacities and configuration. The model integrates supply across U.S. transportation networks, including current tariff and transport rates and planned infrastructure development. We utilize this model to analyze the impact of new or re-configured infrastructure, evaluate changes in refined product prices, and to forecast differentials for crude qualities given their access to refining infrastructure and product yields.

Develop a solution that is better, faster, and less expensive than what could be created in-house

Apply a leading edge process that is custom built on a case-by-case basis

Increase shareholder value by applying high-science multi-variate analytics techniques to improve performance

Support the entire lifecycle of the project, from software architecture to delivery to training for continued success

ABOUT DRILLINGINFO SERVICES

In the constantly changing oil and gas industry, everyone needs to do more with less. You need a partner who will collaborate with you to produce tangible results customized for your business. With Drillinginfo Services, leverage our oil and gas experts and industry veterans, as well as our innovative technology and proprietary data, to solve your most complex problems and to drive success in a competitive market.

Drillinginfo Services consultants have years of oil and gas industry experience and technical expertise. Partner with a team that understands your specific problem and will work with you to create a tangible, customized solution that will continue to produce top-tier results well into the future.

Customer quotes:

"We have successfully created models and landed all wells in our project with a high degree of confidence...this is a huge milestone."

"We've received excellent support from DI on our Permian project...we're so happy with the results, we'll be presenting the project at our next industry convention."

PROACTIVE

EFFICIENT

COMPETITIVE

By monitoring the market, Drillinginfo continuously delivers innovative oil & gas solutions that enable our customers to sustain a competitive advantage in any environment.

Drillinginfo customers constantly perform above their competitors because they are more efficient and more proactive than the competition.
