

# BETTER, FASTER SOLUTIONS FOR THE MIDSTREAM MARKET

FUEL YOUR SUCCESS WITH DRILLINGINFO

 **drillinginfo**  
better, faster decisions

# WE'RE CHANGING THE WAY MIDSTREAM OIL AND GAS COMPANIES DO BUSINESS

**D**rillinginfo provides midstream companies with the most innovative tools and up-to-date data to fuel infrastructure growth.

Our midstream clients have access to intelligence that helps reduce risk and anticipate production surges, resulting in more accurate, efficient planning and higher revenues.

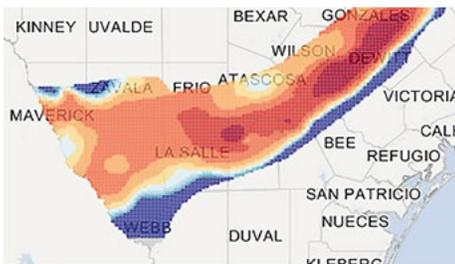

*“ You take what is currently 20 hours of work for my team, and turn it into a 30 minute exercise. ”*

– VP of Business Development, Pipeline Company

# DRILLINGINFO SOLUTIONS FOR THE MIDSTREAM MARKET

## DI ANALYTICS

Foundational data sets, such as production, leasing, and permits, with more complex analytical layers

**Get Baseline Data with DI Analytics Graded Acreage:** Is it the operator or is it the rock? Compare operator performance on a normalized basis for better benchmarks on your production estimates.

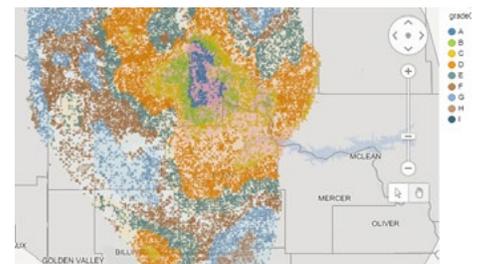

## PRODUCTION WORKSPACE

Predict ultimate recoverables with confidence; P10, P50, P90 values help you easily analyze the spread.

**Reduce Risk with Production Workspace Probabilistic Decline Curve Analysis:** Produce more accurate Estimated Ultimate Recovery (EUR) predictions with autofit technology that automatically selects the best fit for decline curves.

## DI RIGS ANALYTICS

Up-to-date rig data on 95% of the U.S. fleet, primarily through GPS; no more waiting for time sensitive information

**Anticipate Demand with DI Rig Analytics DUC Wells:** Be the first to act when supply comes back online by knowing exactly where drilled but uncompleted (DUC) wells are, who is operating them, and whether those operators are active.

Midstream companies rely on the accurate, dynamic market intelligence that Drillinginfo provides to scout deals and monitor competitor activity. With important data in a single source, our midstream clients can find current deals and predict future opportunities faster and easier than ever.

## Gather baselines, minimize risk, and predict future production surges in a single source

Compare operators to identify the best and worst-performing companies in an area

Proactively monitor changes in leasing, permitting, and production over time

Track 95% of the U.S. rig fleet in near-real-time

Pinpoint expiring and inactive acreage by level of quality

Identify DUCs across 14 key states

Visualize detailed, up-close pipeline data

Access market, competitor, and customer activity data in a single source

Verify customer production estimates by predicting more accurate Estimated Ultimate Recovery (EUR)

**PROACTIVE**

**EFFICIENT**

**COMPETITIVE**

By monitoring the market, Drillinginfo continuously delivers innovative oil & gas solutions that enable our customers to sustain a competitive advantage in any environment.

Drillinginfo customers constantly perform above their competitors because they are more efficient and more proactive than the competition.
